# WELCOME

## to Gateway Longview's Parent Training Program!

Our program is designed to empower parents by addressing concerning behaviors exhibited by children and providing effective strategies for successful intervention. Through hands-on classes, parents gain knowledge and practical experience, enabling positive interactions and the building of positive relationships with their children.

An instructor will observe each family in home or during a supervised visit to tailor our support to each family's unique needs. As part of our comprehensive approach, we provide discharge summaries with personalized recommendations, ensuring that parents receive the guidance necessary to foster strong and lasting connections with their children.
